

SATELLINE SaTerm software version 4.3.5 release note

CHANGES

The changes from the previous released version 4.2.0:

ADDED:

- Automatic save of the used workspace
- Serial port selection update for existing PC COM ports
- Flash update support for SATELLINE EASy Pro 35W
- "Close All"/"Open All" button for Terminal window COM ports
- Improved support for USB to RS-232 adapters
- Terminal window byte counter for RD and TD data
- Message Routed modem networks testing with "Ping"-commands

ERROR FIX:

- The Transmit window is automatically saved for re-opening
- Script-messages (SHIFT + function key) are transmitted simultaneously to all terminals, which has the Mirror mode activated in the serial port setup
